

The background of the entire page is a photograph of a construction site. A tall, modern skyscraper is under construction, with its lower floors featuring a glass facade and upper floors still in a steel framework. Several large yellow tower cranes are positioned around the building, with their long jibs extending upwards and outwards. The sky is a clear, bright blue with some light clouds. The overall scene conveys a sense of active construction and modern architecture.

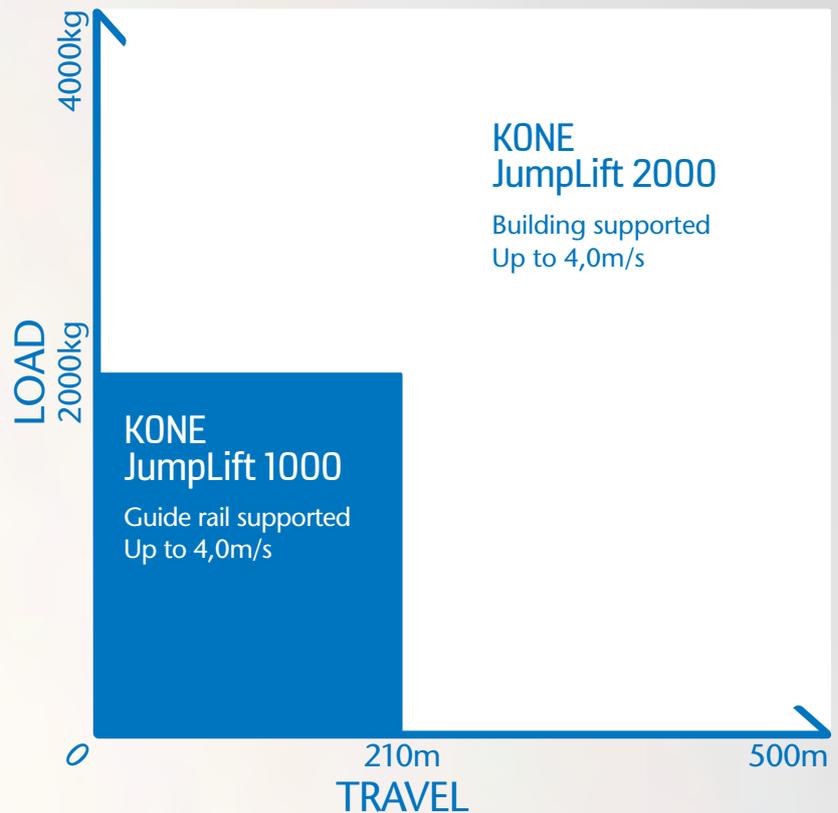

IMPROVING PEOPLE AND GOODS FLOW DURING CONSTRUCTION

KONE JumpLift™

KONE JumpLift is a self-climbing construction time elevator that moves construction workers and their tools throughout the building.

As the building grows higher, new floors are served after each jump. In “jump” the mobile machine room is moved up in the shaft so the elevator car can serve the top floors as the building grows taller.

Protection deck

Installation platform

Mobile machine room

Permanent elevator

Rope reels

- Faster construction

- Lower overall costs

- All-weather operation

- Improved safety
- Earlier closing of the facade
- Reduced downtime
- Earlier availability of permanent elevator

Dedicated to People Flow™

KONE provides innovative and eco-efficient solutions for elevators, escalators, automatic building doors and the systems that integrate them with today's intelligent buildings.

We support our customers every step of the way: from design, manufacturing and installation to maintenance and modernization. KONE is a global leader in managing the smooth flow of people and goods throughout buildings. This makes us a reliable partner throughout the life cycle of buildings.

We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE MonoSpace®, KONE NanoSpace™ and KONE UltraRope®.

KONE employs over 55,000 dedicated experts to serve you globally and locally.
